Track & Trace Solution

WWW.E-INCUBE.COM

The company focusing on Track and Trace Solutions, with a mission to create disruptive solutions to increase efficiency in the supply chain in consumer health by using the latest Distributed Ledger Technology (DLT) including Blockchain.

Track & Trace solution

Is an InCube Blockchain product to identify, track and trace unit level items while moving along the supply chain from raw material/production to finished products on the shelf. Effective, well-designed, and citizen-centric IT solution that streamlines the overall processes, closes the loops and gaps, increase work efficiency and customer happiness, according to the national and international standards. Traceability enables a better insight into what goes into produced goods and substances. You will comply with traceability standards, regulations and recommendations, combat counterfeiting, secure your distribution channels, achieve delivery service levels and manage recalls efficiently.

DLT is a timestamped series of immutable records of data that is managed by a cluster of computers not owned by any entity, each of these blocks of data is secured and linked to each other using cryptographic principles, while data gets decentralized on distributed ledger.
